# QUALITY QUARTZ SURFACES

Quality Quartz Surfaces is a division of a family-run business that has been operating since the early 2000s. When you choose us, you know that you are buying from a one-of-a-kind company that is customer-focused. Clients love the fact that we take the time to understand what they are looking for. Our team know everything there is to understand about quartz surfaces and will use their knowledge to advise on mid and top-end quartz products.

Monitoring the market and being alert to new products and trends is something that our team does continually. You should also make use of our supply and fit service, with all installations completed by our in-house specialists.

This is the home of beautiful quartz surfaces. No matter your requirements, design preferences or budget, here you will find the perfect quartz worktop.

Choose from a fantastic range, suitable for any type of environment where a solid worktop can add glamour and functionality. Whether you prefer a traditional design or something more contemporary, our quality quartz surfaces add the perfect finishing touch to any room.

Clients can find all top brands here along with a range of popular surfaces i.e. granite, ceramic and Dekton. No matter which material you opt for, you are promised a delightful-looking worktop that will look as stunning as it is strong.

The other wonderful thing about quartz worktops is that they are affordable. Discuss your budget with us and we will guide you through a selection of finishes and colours. Both polished and matt surfaces are available, all in a range of thicknesses.

Bringing together qualities of durability, strength and toughness, nothing adds a touch of elegance to a home more than composite quartz.

An extremely strong mineral, it comes second in strength to diamonds. Quartz worktops are also non-porous. This is a must-have trait when it comes to kitchens and food prep areas, as it will never trap bacteria or viruses. Choose from a wonderful mix of colours and patterns.

# BRANDS WE SUPPLY

We pride ourselves on having a fabulous collection of branded worktops available. To help you make a choice, we have listed some of these brands below. However, this is not an extensive list. If you don't see what you want, please ask. Don't feel overwhelmed by the amount of choice as our experienced staff will assist you in making the right selection.

Each brand is different and has a varied range of colours, qualities and prices from which to choose. When making your decision we can help by explaining the differences between each product.

## **Caesarstone**

This premium quartz worktop is beautiful to look at whilst providing many wonderful qualities. Suitable for both domestic and commercial projects.

## **IStone**

Manufactured using quality materials, iStone provides a worktop with superior performance qualities. Extremely durable, it results from the marrying of quality craftsmanship and the latest technology. Suitable for use in even the most demanding of environments.

## **CRL Quartz**

This comes in a fabulous range of colours with the option of a honed or polished finish. Suitable for a variety of uses, it comes in two thicknesses – 20mm or 30mm.

## **NileStone**

Referred to as Nile Quartz, this worktop is one that stands out. It comes in a range of bold colours such as greens and blues. Calacatta Quartz is a real head-turner if you want something very special. Customers who want to set a trend rather than stick with the norm love the NileStone range.

## Silestone

---

Both beautiful and hardwearing, Silestone is resistant to scratches, stains and even accidental knocks and scrapes. This makes it the perfect worktop for all types of environments.

## Dekton

---

Dekton comes in a range of stunning designs and is stain resistant, also withstanding scratches, heat, and fire and UV rays. Available in a choice of colours, it can be used outdoors.

## Marazzi

---

Known for its choice of satin, glossy and matt finished surfaces, this is a sophisticated choice. Created specifically for worktops, tabletops, doors and a host of other bespoke uses, whether in a residential or commercial setting. Available in large-sized porcelain stoneware slabs.

## Unistone

---

This is a quartz composite of fantastic quality. With a content of more than 90% quartz, it is created by using the awesome Breton technology.

## Neolith

---

A very popular sintered stone worktop, this also makes a great choice where large slabs are required, such as wall cladding.

# EDGE PROFILES
